

Most Innovative Product of the Year.

Named most innovative product of the year by the 2009 LFI Innovation Awards, Lightolier's solid-state downlight applies LED technology without compromising architectural lighting demands. Delivering 1,000 lumens while consuming only 20 watts, Lightolier's proprietary remote phosphor technology redefines how light from blue LED's is converted to white while providing excellent glare control and consistent, uniform color across products.

- 50 lumens delivered per watt consumed
- 50 degree physical and reflector cutoff
- Round, square, wall washer and decorative options
- 80 CRI at 3000 Kelvin CCT
